

FAQS ON NEW RECYCLING PROGRAM

What is changing with the recycling program?

Beginning in January, residents who recycle—as well as those interested in starting—will receive larger 96-gallon recycle bins. In addition to the change in bin size, Republic Services will use single-stream recycling, which allows residents to put all their recyclables in the same bin. No sorting is required with single-stream recycling.

When do I get my new bin?

New bins will be delivered January 6, 7, 13 and 14.

What happens to the small blue bins now in use?

All current bins are being replaced by 96-gallon bins. Republic Services will take your old bin when they deliver your new one.

Can I continue to use small bins if I don't want the big bin?

No, Republic Services will be picking them up and recycling them.

What if I don't currently recycle, but want to start?

If you don't currently recycle, but would like to start, call Republic Services at 800-876-9001 to request being added to the schedule.

Why should I recycle?

Our community benefits in many ways through recycling:

- Protects the environment
- Reduces landfill
- Conserves resources
- Saves energy
