## **AUBURN FIRE PREVENTION CODE ORDINANCE 2004-003**

### **506.1 KEY BOX-WHEN REQUIRED**

Whenever the servicing fire department has instituted a key box emergency access system, a key box compatible with that system shall be installed in an accessible location if:

- 1) The building is protected with an automatic sprinkler system equipped with a local or transmitted water-flow alarm, or
- 2) The building is provided with any fire alarm system equipped with an outside audible/visual signaling device, or
- 3) The building is provided with any fire alarm system where the alarm is transmitted to an off-site location, or to the fire alarm center for the servicing fire department.

### **506.2 RESPONSIBILITY FOR KEY BOX**

Key boxes are to be provided by the building owner and shall contain such keys necessary to access all protected areas of the building. Multi-tenant buildings may share an owner provided box, and the building owner shall assume responsibility for insuring that keys are updated as appropriate. Tenant-provided boxes may not be shared with any other tenant, and the tenant assumes responsibility for key updates for the subject tenant space.

**EXCEPTION:** Key boxes for apartment houses are not required to contain keys to Individual apartment dwelling

### **506.3 EXISTING BUILDINGS**

When a design release is issued by the office of the state building commissioner or a permit by local government when a design release is not required for construction, buildings constructed prior to April 30, 1998 shall not be required to provide a key box or key boxes under this section. Any new tenancy within space previously occupied by a different tenant shall require that a key box be provided in accordance with Sections 506.1 and 506.2. Existing buildings required to install a key box or key boxes by this section shall not be in violation of this section until (1) year after the effective date of this code.

(675 IAC 22-2.3-53) EFF: May 17, 2003

(Key boxes shall be mounted near the main entrance to the structure and at a mounting height of between 48 inches and 60 inches.)
